These steps continue the CyberArk® set up:

- After selecting Devices
- Select Add Devices
- You will be presented with a personal QR Code (Do not close the portal window. You will be scanning this QR code twice)
- Scan the device QR code with your mobile device camera

You will be prompted to install the CyberArk® Identity app
- Click Continue

You will be taken to the App or Google Play Store to install and open the CyberArk® Identity (formerly Idaptive) app
- Scroll down and select Enroll with QR
- Click Continue

Grant CyberArk® Identity permission to use camera
- Go to your PC or Mac and return to the CyberArk® portal
- Scan your device QR code one more time using your mobile device (Keep the portal window open on your computer)
Add the CyberArk® Identity app to your mobile device cont.

- After the second scan, you will be prompted to click **Continue** to enroll your device.

- On your computer return to the portal, and close the device QR code window only.

- Select **Account**, then **Show QR Code** (This QR code is different from the device QR code you used previously).

- You will see this pop-up window that will display next steps and a **OTP QR Code** customized for you (Do not close the portal window).

- Scroll to the end of the disclosures listed, then click **Enroll**.

- After clicking **Enroll**, you will be taken to the CyberArk® Identity app on your mobile device and prompted for your preferences.

- Scroll to the end of the disclosures listed, then click **Enroll**.

- After clicking **Enroll**, you will be taken to the CyberArk® Identity app on your mobile device and prompted for your preferences.

OATH OTP Client

1. Install your 3rd party authenticator app.
2. Launch your authenticator app and tap the “+” icon or the “Add Account” button to add a new account.
3. Select “Scan Barcode” or “Scan QR Code” and use your phone’s camera to scan this code.
4. Once you have scanned the code, enter the 6-digit verification code generated by the authenticator app and click verify.
